Summary

Second-year MPA student at LSE with training in econometrics, causal inference, and applied data analysis, with experience taking quantitative work from modelling through to visualisation and communicating results clearly to non-specialist audiences. Undergraduate dissertation at Bocconi analysed firm-level credit access across Northern Italian provinces using fixed-effects panel models; current capstone with Moody's Ratings classifies 208 countries by sovereign natural resource dependency, including a supply chain mapping of Chile's critical mineral sector across 363 facilities and 17 commodities.

Education

London School of Economics and Political Science

London, United Kingdom

MPA IN DATA SCIENCE FOR PUBLIC POLICY

Sep. 2024 – Jun. 2026

- Capstone with Moody's Ratings: classified 208 countries by sovereign exposure to natural resource dependency, building Python pipelines to reconcile inconsistent country codes, unit definitions, and reporting years across providers; methods include K-means clustering, Ridge regression, XGBoost, and LightGBM; includes a supply chain mapping of Chile's critical mineral sector across 363 facilities and 17 commodities
- Coursework: Applied Machine Learning, Advanced Empirical Methods (DiD, IV, RDD, Synthetic Control), Network Analysis, Spatial Statistics, Growth Diagnostics

Università Commerciale Luigi Bocconi

Milan, Italy

BSc IN INTERNATIONAL POLITICS AND GOVERNMENT (108/110)

Sep. 2021 – Jul. 2024

- Dissertation: analysed geographic variation in firm-level credit access across Northern Italian provinces using fixed-effects panel models on a multi-year firm-level dataset, isolating province-level credit conditions from firm and sector confounders
- Coursework: Econometrics, Microeconomics, Policy Evaluation (DiD, IV, RDD), Quantitative Methods, Behavioural Economics, Computer Science

Yale-NUS College

Singapore

FOREIGN EXCHANGE PROGRAM

Jan. 2024 – Jun. 2024

Professional Experience

Gibi Trieste

Trieste, Italy

OPERATIONS & E-COMMERCE INTERN

Aug. 2024 – Aug. 2025

- Built an inventory tracking system in Excel linking Vix Commerce order data to warehouse stock counts, replacing a manual process that had caused repeated fulfilment errors
- Managed product listings, photography, and pricing within its online marketplaces, growing the e-commerce share from near zero to 20% of company revenue

Methexi Political Compass

Remote

POLITICAL ANALYTICS & USER ENGAGEMENT

Apr. 2024 – Jul. 2024

- Designed a quantitative scoring methodology for an interactive political matching tool used in the 2024 European Parliament elections in Greece, validating ideological classifications across all response combinations and documenting the methodology for external stakeholders
- Achieved first-page Google ranking for "Political Compass" in Greece, generating over 10,000 completed surveys and a 40% click-through rate through organic distribution

Skills

Languages Italian (Native), Croatian (Native), English (Working Proficiency, IELTS), French (B1)

Technical Python (numpy, pandas, scikit-learn, statsmodels), R, Stata, advanced Excel

Methods Causal inference (DiD, IV, RDD, fixed effects), machine learning (classification, clustering), network analysis

Interests Hiking, Electoral Politics, History, Urban Planning, Linguistics, Cartography
